# HARDY HEDGES

## PLANTING AND GROWING HEDGES

Beautiful hedges are easily grown if a few simple instructions are observed. Dig a trench 10 to 12 inches deep and the width of a spade. Set the plants a couple of inches deeper than they stood in the nursery. This insures a dense hedge at the base. Privet should be set 10 inches apart, Barberry about 18 inches. Shrubs such as Spirea 18 inches, Chinese Elm 2 feet, and Evergreens 2 to 3 feet. Spacing may be varied depending upon the density desired. After spacing the plants, fill in about one-half of the depth of the trench, then flood with water. After settling fill in balance of the trench and tramp firmly. Leave a slight depression along each side of the hedge to retain water. Keep thoroughly soaked until well started. Privet should be cut back to about 8 or 10 inches after planting to promote vigorous growth. Hedges planted in this manner rarely fail to grow.

## OLD-FASHIONED LILAC

No other shrub has quite the place in the hearts of people that the old-fashioned lilac has. Grows anywhere and its masses of light purple bloom in early spring are a constant delight. Fine for tall hedges, screens or specimens. No grounds complete without this fine old shrub. Grows to 10 or 12 feet tall.

## LILAC VILLOSA

(Hungarian Lilac)

Leaves twice the size of regular Lilac. Dark green and waxy. Blooms about 30 days after other Lilacs have finished. An excellent variety to add to your plantings to prolong the blooming season. Grows to 10 feet tall. Heavy 2-yr. size.

## FRENCH PUSSY WILLOW

A small treelike shrub with attractive leaves 2 inches long and an inch wide. Its popular appeal is the conspicuous silky catkins which bud in the fall, and make those "springy" bouquets just as the snow melts in the spring. Grows about 10 feet tall.

## WHITE FRINGE

One of the showiest of all shrubs. Grows to small tree height, with large shiny leaves of deep green. Graceful and drooping, it bears clouds of lacy white blooms. Branches start close to the ground and it may be grown as a shrub or trimmed up and grown as a dwarf tree. Good in borders or for specimens.

## BUSH HONEYSUCKLE

For a tall hedge or to screen an unsightly view there is no shrub so valuable. Will grow to the height of 10 to 12 feet in a few years. A beautiful shrub both summer and winter. Is the first to clothe itself with leaves in the spring, and its fragrant flowers and luxuriant foliage are a constant delight. Bright red berries cling to the bush all through the winter, giving a brilliant touch of color to the winter landscape.

## FLOWERING ALMOND

Earliest spring-flowering shrub, in full bloom before the leaves appear. Beautiful pearly pink, double blooms snuggle tight to the twigs, completely covering the bush. Medium height, reaching about 4 feet.

## NEW GOLDEN SPIREA

A beautiful shrub with bright yellow leaves which turn to golden bronze in the fall. White blossoms followed by brilliant fruits. A sturdy, upright grower and valuable for color contrast.

**ARBORESCENS GRANDIFLORA** (Snowball Hydrangea). Has the appearance of a low-growing Snowball. White, clustered flowers appear in June and July, lasting for weeks. Very hardy and does well in shady locations.

**OAK-LEAVED HYDRANGEA.** A truly marvelous bushy shrub. Flowers in large creamy clusters. The dark green foliage has a silvery sheen on under side and turns to a glowing red in the fall. Grows to a height of 4 or 5 feet, and is very effective as an ornamental shrub. Does well in shady locations. 50c each; 3 for \$1.25.

## Special NANKING CHERRY

(Prunus Tomentosa)

Beautiful dark waxy green leaves. Bright red fruits are edible if desired. Grows to 10 feet high. A valuable addition to a tall shrub border or may be used as specimens. Creamy white blossoms in profusion. Heavy 2 to 3 ft. size. 50c each; 3 for \$1.25.

## WITCH HAZEL

Hardly any other shrubs bloom in the late autumn, but that is the season when the Witch Hazel flaunts its brilliant yellow flowers. It blooms for a long period and has interesting fruits before the last blossoms have faded. Sometimes it is still in bloom when early snows come, but it is unharmed even by zero weather. Witch Hazel will be an interesting and valuable addition to any shrub border. Grows 4 to 5 feet high.

## FORSYTHIA SPECTABILIS

Earliest blooming. Lights up the landscape with glinting yellow before the leaves appear. Flowers often come out before the snow is gone. This is the large flowering variety, having flowers twice the size of the older kinds. Thrives in any locality. Grows 8 to 10 feet tall. May be pruned.

## MOCK ORANGE

**VIRGINAL.** Blooms throughout the season. This wonderful Mock Orange is without question one of the most beautiful of the shrubs. Single flowers on one year wood; double flowers on two-year wood. Grows 6 to 8 feet in height and is a valuable addition to any shrub group. Blooms with single flowers on fine for cutting. 60c each; 3 for \$1.50.

**CORONARIUS.** Sweet-Scented Mock Orange. A tall vigorous bush with abundant dark green foliage and single blossoms having a sweet fragrance. Grows 5 feet tall.

## RHAMNUS FRANGULA

(Alder Buckthorn)

Same characteristics as Rhamnus Cathartica except it grows more slender shaped and the leaves are smaller and thinner.

## SNOWBERRY

(Symphoricarpos)

**WHITE SNOWBERRY.** Diminutive rose-colored flowers in June and July followed by clustered milk-white fruits which remain far into the winter. Bush is compact in form with numerous slender branches. Can be used in small groups or large masses. Due to its dwarf habit it is valuable for foregrounds in shrub plantings. Grows about 30 inches high.

## NEW RED SNOWBERRY

This is the greatest shrub for shady places that we have ever seen. Grows to a height of 5 feet with gracefully arching branches and lacy foliage. Blooms are followed in fall by glowing red berries, twice the size of the old Indiana Currant and as red as those of the High-Bush Cranberry. Don't fail to get some of these shrubs for shady locations.

## SPIREA VAN HOUTTEI

Without doubt one of the most useful and most widely used shrubs in cultivation. Blooming in April and May, the plant throws out long branches that curve and droop to the ground, weighted with a mass of pure white flowers that suggest a fountain of snow. May be used for specimens, mased, or for hedges. Will grow to 8 feet high if untrimmed.

## WINTERBERRY

(Ilex Verticillata)

Beautiful foliage, flashing red berries remain until Christmas. Branches and berries make excellent Christmas decorations. Splendid growing habit makes this an outstanding and beautiful shrub.

## FIREBUSH

Early in the spring this attractive shrub is completely covered with dazzling orange-scarlet flowers which are followed by small, fragrant, quince-shaped fruits. Foliage waxy and dark green. Branches are rough and closely knit, making it desirable for low hedges.

**RED TWIG.** Grows 6 to 8 feet high, with clusters of fine white flowers; white berries. Stems and branches turn to blood-red in winter.

**YELLOW TWIG.** Similar in habit to Red Twig except the bark is a beautiful golden yellow.

Flowers are bell-shaped, pale pink with orange veins, and are borne in long clusters along the branches. Does well in shade and grows rapidly. Reaches 6 ft in height.

## EUONYMUS ALATUS (Cork Bark)

## COTONEASTER DIVARICATA

A Truly Exquisite Shrub

Slender upright branches are covered with small dark green leaves which remain late into the fall. A semi-dwarf type rarely reaching five or six feet in height.
